

NO END IN SIGHT!

SENTE LINES UP THE WORLD'S LARGEST SELECTION OF HOT GAMES!

While other systems come and go, Bally Sente brings out one hit game after another. Virtually every other manufacturer has taken a fang at making a "system." After all, it's a great idea aimed at helping the operator improve his return on investment. However, one by one these systems have dropped by the wayside because the maker wasn't really committed to the operator, or else decided to sell the best games in dedicated form (or even worse, to the home market first!). At Sente we do **only one thing**: create more of the best coin entertainment **exclusively** for the Sente System.®

As a smart operator, you should be concerned with two things when looking at a system: the quantity and quality of the games available right now, and the manufacturer's commitment to future innovative game development. Based on either criteria . . . nobody even comes close to Bally Sente!

...And the hits keep on coming!
